Unique pattern design:

1. Accurate calculation of the design pattern pieces.
 2. Widening the tread design, with a central longitudinal groove straight rib pattern.
 3. The most advanced computing software variable pitch tread optimal rehearsal.
 4. PCR special tread compound.

Excellent performance:

1. Provide optimized tread handling, wet skid resistance.
 2. Holding strong, directional precision, handling, braking drive good.
 3. To achieve a quiet and comfortable ride.
 4. High-speed, slippery, rolling resistance, noise, the best performance combination.

* New Developing Size / The Labeling Information Is Subject To Change Without Notice.

Unique pattern design:

- 1. Four wide circumferential tread grooves and lateral grooves with fine sipes provide efficient water evacuation, outstanding wet performance.
- 2. Continuous block patterns on shoulder enhance the ride stability at high speed cornering. The rim protector will protect wheels from curb damage.
- 3. Continuous outside tread blocks enhance excellent performance and precise control when cornering at high speed. The special rib segment design optimize contact pressure distribution, improve road contact area and provide precise control. The serrated groove walls absorb noise and deliver a quiet ride.
- 4. Special tread compound delivers excellent grip on both dry and wet roads and reduce the rolling resistance to save oil and protect environment.

Unique pattern design:

- 1. Wide circumferential grooves help efficiently evacuate water from beneath the tread.
- 2. A special tread block sequence helps enhance handling and traction while also reducing road noise.
- 3. Premium sidewall styling offers a contemporary appearance.
- 4. RunOnFlat technology allows for driving up to 80 km. on a deflating or deflated tire at a top speed of 90 km/h.

* New Developing Size

* New Developing Sizes / The Labeling Information Is Subject To Change Without Notice.

Unique pattern design:

- 1.A streamlined and continuity of both the asymmetric tread design.
- 2.The difference between both sides of the shoulders rigid design.
- 3.Wide running surface.
- 4.“Rim Protecto” special design.

Excellent performance:

- 1.High-speed straight is more stable, more comfortable ride.
- 2.Simultaneous driving comfort and cornering performance.
- 3.The steering is more stable.
- 4.Superior braking and braking performance.

Ride Comfort Quiet Comfortable Braking Stable M+S

Unique pattern design:

- 1.A streamlined and continuity of both the asymmetric tread design.
 - 2.The difference between both sides of the shoulders rigid design.
 - 3.Wide running surface.
 - 4."Rim Protector" special design.

Excellent performance:

- 1.High-speed straight is more stable, more comfortable ride.
 - 2.Simultaneous driving comfort and cornering performance.
 - 3.The steering is more stable.
 - 4.Superior braking and braking performance.

New Developing Sizes / The Labeling Information Is Subject To Change Without Notice.

Unique pattern design:

- 1.Four straight longitudinal groove.
- 2.Streamlined staggered transverse groove, with scattered fine pattern spes.
- 3.Super struction design.
- 4.The special formula.

Excellent performance:

- 1.To provide the necessary high-speed performance, and ensure excellent drainage properties.
- 2.Provide excellent grip performance, but also suitable for snow with it.
- 3.Manipulate both reliable and durable.
- 4.To provide excellent wear resistance and high-speed performance.

Ride Comfort Quiet Fuel Efficiency Long Mileage M+S

Unique pattern design:

- Four main zigzag grooves and rough lateral blocks provide excellent traction on all kind of road conditions.
- The open shoulder grooves prevent aquaplaning with anti-slip sipes, grooves performance and prevent rainwater evacuation. The white letter styling provide a artistic image.
- The block tread design with multiple-sipes provide outstanding off-road traction and reduce tread damage on off-road condition.
- 4 jointless Nylon band and strong structure design provided the strong carcass to enhance the reliability and durability. Special tread compound and wide footprint enhance tread life and deliver excellent braking on wet and dry roads.

Unique pattern design:

- 1.Three main zigzag grooves and aggressive pattern design provide outstanding traction on all of road conditions.
- 2.High void ratio and open shoulder offer excellent resistance to aquaplaning and self-cleaning performance.
- 3.The block road design with multiple-sipes provide outstanding off-road condition. Special casing profile and solid shoulder pattern enhance the max traction and cornering performance.
- 4.Jointless Nylon band and strong structure design provide the strong carcass to enhance the reliability and durability. Special tread compound and wide footprint enhance tread life and deliver excellent braking on wet and dry roads.

*New Developing Sizes / The Labeling Information Is Subject To Change Without Notice.

Unique pattern design:

- 1. Off-Road Maximum Traction Tyre, designed for extreme 4x4 application, confidence in performance on muddy, snowy and rocky terrain as well as sealed road performance with extra ground clearance, higher load-carrying capacity, and greater ability to go off-road. 4x4 enthusiasts know it for its long wear, low noise and aggressive tread pattern.
- 2. Strategically placed ribs within the lateral grooves of the tread design help to discharge stones and resist stone drilling.
- 3. Specially developed tread compound helps resist the cutting, tearing and churning commonly developed in extended off-road applications.
- 4. Strategically placed in the lower side wall area, a raised rim protector helps protect the wheel and tyre from hazards in off-road driving conditions.

Unique pattern design:

- 1.The new butterfly pattern.
 - 2.Tortuous longitudinal main grooves with cross coherent transverse grooves and sipes supplemented.
 - 3.Outline the latestet design technology.
 - 4.Special wear resistant tread compound.

Excellent performance:

- 1.The more beautiful.
 - 2.To provide a firm grip wet and dry roads.
 - 3.The tire speed, durability, superior load performance.
 - 4.Have a good performance at low temperature environment.

Unique pattern design:

- 1 Reinforced structure and special abrasion resistant tread compound deliver extra puncture resistance and load bearing capability with more mileage.
- 2 Three main zigzag grooves combined with lateral blocks provide excellent ride stability and great traction on all kinds of road conditions.
- 3 Continuous tread patterns on shoulder and solid shoulder ribs responsive handling and even wear.
- 4 White sidewall rib shows extraordinary appearance.

Unique pattern design:

- 1. Four main grooves provide good driving stability and wet performance.
- 2. Reasonable pattern area, perfect collocation of every grooves.
- 3. Special tread compound, ensure tire performance stability in all kinds of weather conditions.
- 4. White sidewall rib shows extraordinary appearance.

Unique pattern design:

- 1. Central straight & Z wide Zip-Zag circumferential grooves, with the design of convexes in the bottom, improve the traction, shorten braking distance and increase the stability on the snow road.
- 2. Wide rolling tread, by using computer-optimized design, makes sure enough contact area for more grip. The wide open shoulder grooves prevent aquaplaning with enhanced wet grip and provide excellent water&snow evacuation.
- 3. Biomic tread pattern design makes whole tread blocks' stiffness more with the optimized deployment of "Z" shape sipes, provide great grip on snow & ice condition.
- 4. Special tread compound remains flexible at lower temperatures to make sure the grip on winter road condition, while reduce the rolling resistance.

Unique pattern design:

- 1.Four wide circumferential tread grooves and lateral grooves with fine sipes provide efficient water evacuation, outstanding wet performance. The optimized deployment of "Z" shape sipes, provide great grip on snow & ice conditions.
- 2.Continuous block patterns on shoulder enhance the ride stability at high speed cornering. The rim protector will protect wheels from curb damage.
- 3.Continuous outside tread blocks enhance excellent performance and precise control when cornering at highspeed. The special rib segment design optimize contact pressure distribution, improve road contact area and provide precise control. The serrated groove walls absorb noise and deliver a quieter ride.
- 4.Special tread compound remain flexible at lower temperatures to make sure the grip on winter road conditions and reduce the rolling resistance.

Unique pattern design:

- 1. Ideal for conditions in the region which does not require extreme snow tyres and more performance is required.
- 2. This unique tread design also features a proven modular tread block geometry which offer a level of grip and performance which is unique in its class.
- 3. A directional tyre that offers fantastic water dispersion and exceptional grip thanks to its unique features which includes an excessive number of sipes allowing the tread to conform to the road surface, and its extra wide channels that excavates fluids in preposition to the pressure and weight of the vehicle and road requirements.

Unique pattern design:

- 1.Accurate calculation of the design pattern pieces.
- 2.Widening the tread design, with a central longitudinal groove straight rib pattern.
- 3.The most advanced computing software variable pitch tread optimal rehearsal.
- 4.PCR special tread compound.

Excellent performance:

- 1.Provide optimized tread handling, wet skid resistance.
- 2.Holding strong, directional precision, handling, braking drive good.
- 3.To achieve a quiet and comfortable ride.
- 4.High-speed, slippery, rolling resistanc, noise, the best performance combination.

Unique pattern design:

- 1. The compound mixture ensures longevity without compromising on safety and performance.
- 2. This unique design offers stability in cornering, it has superior performance due to its superior design, where the Royal A/S provided performance as an all-rounder tire, the Royal A/S provides superior performance in cornering on slippery conditions.
- 3. This design has a superior pitch frequency, which offers a considerable reduction in noise, offering a very comfortable and quiet ride.
- 4. Superior high tensile steel belts for durability, nylon blend cap to maximizes the contact area with the road surface, all of these combined exceeds the goal of having a tire which not only meets the needs of an exceptional all seasons tire, but also provides exceptional performance.

Unique pattern design:

- 1 Two longitudinal and two wavy wide drainage ditch, effectively enhance the water evacuation performance, ensure the excellent handling performance in adverse weather condition.
- 2 Two asymmetric pattern design, with solid blocks, effectively enhance the gripability and safety on winter road condition.
- 3 Substantial knife-shaped grooves with wear steel sheet, keep optimized handling in conjunction, sharp edge provide outstanding traction on wet and slippery surface and winter road condition.
- 4 New tread pattern design, lower-heal tread formulation, softer shore hardness tread than the last generation tire.
